WellStack™

GUTHRIE

Case Study

# $40M+ Annual Value Unlocked Through AI-Ready Data Transformation

## About the Client

A multi-specialty, integrated healthcare system operating **5** hospitals and over **50** outpatient locations, delivering care to more than **2 million** patients across Pennsylvania and New York.

## The Challenge

This multi-state health system was constrained by the limitations of legacy data systems. The lack of real-time insights and enterprise-wide visibility created critical bottlenecks:

- **High denial rates** eroding revenue
- **Outdated reporting** delaying decisions
- **Inefficient care coordination** increasing costs
- **Fragmented and siloed data** limiting enterprise visibility

## The Breakthrough with WellStack

**WellStack delivered an AI-native data foundation- governed, interoperable, and built for action.This health system implemented WellStack's modular platform to unify data, unlock insights, and power next-generation decision-making**

### Unified Foundation

Clinical, financial, and operational data harmonized into a single source of truth

### Real-Time Decision Hubs

Actionable intelligence delivered directly into workflows across departments

### Self-Service Analytics

Flexible tools enabling business users to explore and act on insights without waiting on IT

### AI-Enabled Readiness

A governed infrastructure capable of supporting automation, predictive modeling, and scalable value-based care initiatives

Case Study

# Operational Wins. Clinical Gains. Financial ROI.

## The results

With WellStack's intelligent infrastructure and Decision Hub capabilities, Guthrie achieved measurable transformation across cost, quality, and performance

**$12-13M**
in care gap closure

**$3-5M**
in denial recovery annually

**$10-15M**
in HCC recapture gains

**2-4%**
reduction in avoidable readmissions

## WellStack's platform didn't just modernize data-it operationalized it

### Embedded Intelligence

From dashboards to prescriptive guidance inside EMRs and business systems.

### Built-In Governance & Security

HIPAA-compliant, AI-ready, and aligned with industry-leading standards.

### Rapid Time-to-Value

Demonstrated ROI through real-time insights and workflow integration.

> **You can't act on old data.WellStack's Decision Hub gives us real-time clarity. It's intuitive, self-service, and lets us drill down when we need to. That changes everything.**
