TapestryHealth™

Case Study

Turning RCM Data Overload Into Real-Time, Actionable Insight

Automated reporting. Payer transparency. Vendor accountability

About Tapestry Health

Tapestry Health provides in-facility clinical and diagnostic services across skilled nursing and long-term care facilities, supporting **75,000+ residents nationwide.** With complex, multi-site billing, Tapestry needed reliable RCM data, faster insights, and better control over vendor-driven workflows.

The Challenge

Large, fragmented RCM data from multiple sources obscured critical insights, limiting visibility and slowing cash flow.

Key Challenges Included

- Excel-driven reporting and siloed data
- Inconsistent definitions for denials, write-offs & no-response claim
- Delayed visibility into payer lag & payment timelines
- Duplicate write-offs & mismatched transactions
- Limited vendor transparency and slow reconciliation

The WellStack Solution

A complete, end-to-end RCM data integrity and decision intelligence solution that unified systems, standardized definitions, automated pipelines, and established collaborative processes across provider and vendor teams.

Solution Highlights

- Automated ingestion & reconciliation of claims & remits.
- Unified master tables for payer, facility, allowed amounts & write-offs.
- Standardized definitions & logic
- Enhanced vendor extracts with identifiers for reconciliation & payer analytics
- Enterprise-wide operational framework to improve transparency & accountability
- Weekly provider-vendor validation model
- Power BI Decision Hub with payer, denial & write-off analytics

Automated pipelines + Structured governance

=Trusted data and confident financial decision-making.

Here's what one year looked like

$7M+ ROI from a **24%** improvement in clean claim rates

$110M increase in collections by prioritizing actionable denials

$500K recovered in two months from write-offs that would've walked out the door

Total value impact: **$60M+ (YES, $60M)**

These wins are repeatable.

RCM leaders shifted from reactive reporting to proactive revenue stewardship.

Impact Highlights

Enabled

- Real-time denial tracking (CARC/RARC)
- Payer turnaround time & no-response monitoring
- Facility-level performance drill-downs
- Exception alerts for lag & data anomalies
- Transparent vendor performance review

Delivered

- Stronger cash-flow visibility
- Faster resolution cycles
- Better denial & write-off control

Ready to Build Real-Time RCM Clarity?

Unify RCM data. Automate validation. Drive financial accuracy with confidence.
