WellStack™

WISCONSIN COLLABORATIVE for HEALTHCARE QUALITY

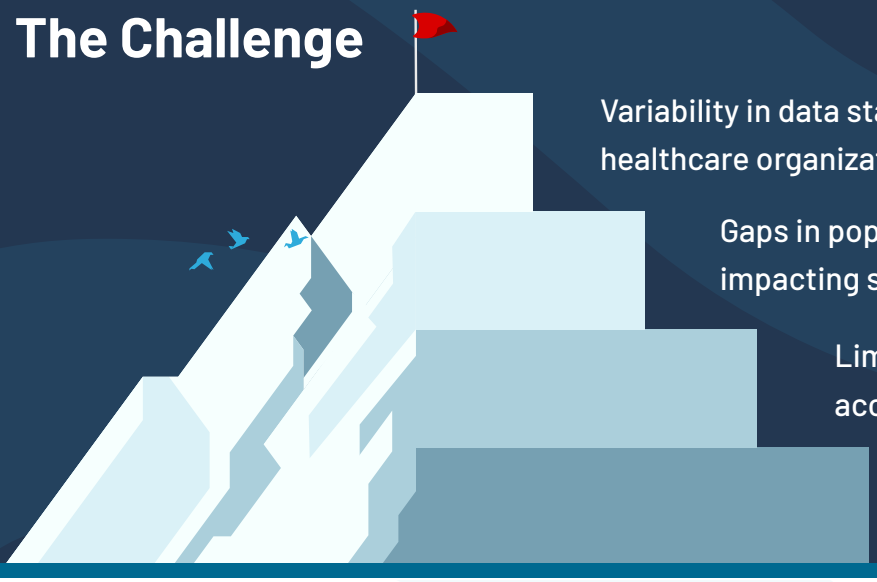
Case Study

Driving Statewide Quality Improvement with Trusted, Standardized Data

About the Client

The Wisconsin Collaborative for Healthcare Quality (WCHQ) brings together 150+ provider and payer organizations, including health systems, clinics, and physician groups, to benchmark performance and accelerate quality improvement across Wisconsin.

The Challenge



Variability in data standards across healthcare organizations.

Gaps in population health reporting impacting statewide initiatives.

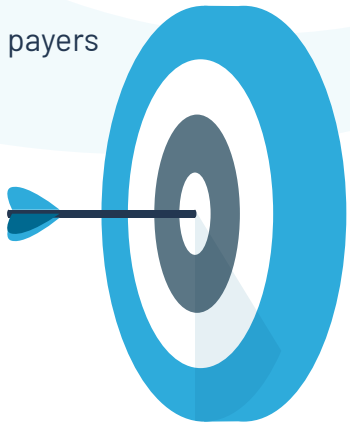
Limited harmonization reducing accuracy ofquality measures.

Manual reporting processes driving high operational burden.

The Breakthrough with WellStack

WellStack enabled WCHQ to:

- Standardize and harmonize **100+ disparate data feeds** from providers and payers
- Strengthen governance to improve trust in comparative quality measures
- Automate statewide reporting pipelines, reducing turnaround time
- Expand reporting capabilities for population health and benchmarking



Coverage at Scale

5M+ members represented

650M+ records processed

150+ provider and payer organizations engaged statewide

600TB data sources integrated (clinical, claims, and other datasets)

100+ of historical and current healthcare data managed

Business Impact

Quality Measure Accuracy

30% improvement

in comparative reporting accuracy

Reporting Efficiency

50% faster turnaround

on statewide reporting cycles

Population Health

Expanded capabilities

enabled earlier detection of care gaps

Stakeholder Adoption

150+ organizations

using standardized insights to improve outcomes and affordability

What our partners say abaout us

Gabrielle Rude, CPHQ, PhD - President & CEO of WCHQ

"We didn't want a vendor who would just say, 'What do you want?' and hand it over. We wanted a partner—someone whowould come to the table with ideas,push us tonew innovations, and design a solution with us.

There's no organization exactly like ours. We needed someone who could design something custom and help us figure out what that even was. Wellstack came in aligned with our vision and built something uniquely for us."
