WellStack™

WISCONSIN HEALTH INFORMATION ORGANIZATION
BETTER INFORMATION. BETTER DECISIONS.

Case Study

Unlocking Statewide Healthcare Insights with a Unified Data Platform

About the Client

The Wisconsin Health Information Organization (WHIO) manages the state's largest All-Payer Claims Database (APCD). It aggregates claims, clinical, and provider data across Wisconsin, serving payers, providers, employers, and state agencies to drive healthcare quality and cost transparency initiatives.

The Challenge

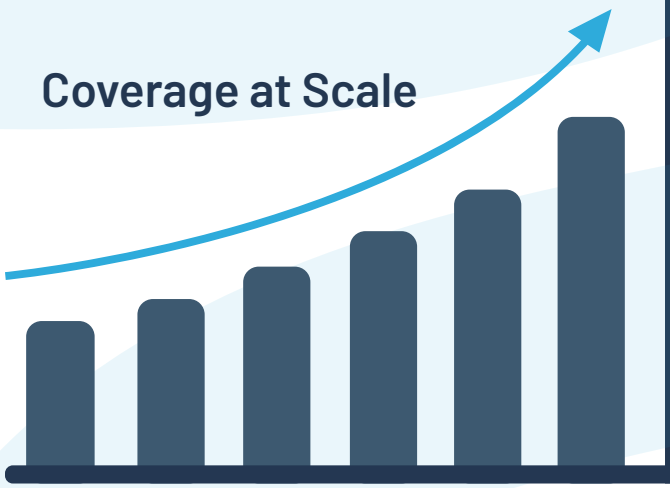
- Integrating multiple payer and provider data sources with inconsistent standards
- Gaps in governance, validation, and data quality assurance
- Limited real-time insights to support statewide outcomes and cost transparency
- High operational overhead from manual ingestion and reporting

The Breakthrough with WellStack

WellStack deployed a **cloud-native, modular data platform** that:

- Delivered clean, analytics-ready data to support statewide initiatives
- Enabled **17 payer organizations** to act on insights for improving quality and affordability
- Automated ingestion and quality checks across claims, clinical, & provider datasets
- Standardized and validated APCD data for accuracy and completeness

Coverage at Scale



5.6M
unique members represented

662M+
unique members represented

17+ data sources ingested
(payers, Medicaid, CMS, employers)

45 TB
of standardized healthcare data managed

Business Impact

Reporting Timeliness
Reporting cycle improved from **quarterly to monthly**

Data Accuracy
Achieved **95%+** validation across multi-payer datasets

Stakeholder Adoption
17 payer organizations actively **leveraging WHIO insights** for quality improvement

Operational Efficiency
20–25% reduction in manual processing effort
